Dear Liz,

Here, finally, is the manuscript for ASPC Vol. 131, 'Boulder-Munich II: Properties of Hot, Luminous Stars'. Incidentally, when you prepare the 'slug' for the title page of each paper, then the shortened title used by all the participants, 'Boulder-Munich II', should be fine if the full version looks too long and clumsy.

We've only budgeted for surface mail for 'overseas' (to you!) participants, so the proceedings volumes should be sent out that way. If it's not too much trouble, maybe my own copy could be airmailed (just vanity, really...)? And a reminder that Nolan Walborn should be sending along a colour image for use as the frontispiece, p. x. It should've already arrived by the time this reaches you; if it hasn't, please drop me an email. Nolan should be billed for the colour printing, but the invoice for the distribution of volumes to the mailing list should come to me.

Finally, thanks for putting up with my emails so cheerfully, and responding to them so promptly and so helpfully. It's been a pleasure doing 'business' with you!

With very best wishes,

Ian Howarth
